www.monroe.com.au

Monroe Australia is committed to excellence in customer service. It therefore continues to offer you a service that is unique to Monroe - Monroe's Technical Helpline. With this facility, technical advice and assistance with any Monroe product is only a phone call away.

The Helpline can provide advice and information on vehicle fitment, product range and applications.

If you've experienced a problem and have checked the Monroe catalogue to verify the unit corresponds to the correct part number, referred to any footnotes or instructions and still haven't found a solution then you should ring the Technical Helpline.

The Technical Helpline is just one of the ways Monroe continues to support you and all its customers Australia-wide.

IMPORTANT NOTES BEFORE YOU CALL.

To ensure you receive a speedy response please have the following information ready before you call;

- Vehicle make/model/year and build date
- Product name
- Product part number on carton
- Part number and date code stamped on product
- Parts package included
- Description of the problem.

OESPECTRUM®

The Monroe® OESpectrum® features the latest global original equipment valving technologies providing an unprecedented level of handling precision and control while filtering out the ride harshness. Multi Disc, 3 Stage bi-directional valving tuned for the optimised balance of ride comfort and improved vehicle handling.

FEATURES

- Multi Lip Seals
- Rod Guide Bearing
- Hard Chromed Rod
- Banded Piston
- Cold Drawn Pressure Tube
- High Strength Low Alloy Steel Strut Components
- All Weather Fluid
- 2 way valving
- Multi Disc Valving For Durability
- Three Valving Stages
- Optimised Balance Of Ride Comfort & Handling

MONROE ORIGINAL	TYPICAL PART No. SERIES
STRUT	37xxx, 39xxx, 56xxx, 57xx, 58xx, 59xx, 74xxxxSP
SHOCK ABSORBER	71xxx, 72xxx, 37xxxxSP
CARTRIDGE	728xx, 73xxx

GT-GAS WITH EXCLUSIVE REFLEX™ TECHNOLOGY

Combines upgraded and refined damping rates, with all the fade - free damping control benefits of gas pressurisation. GT - Gas with Reflex™ Technology delivers enhanced handling and control without any compromise in ride comfort.

FEATURES

- Exclusive twin disc system.
- Nitrogen gas pressurised - optimum performance.
- Teflon banded piston - low friction, long service life.
- High displacement, multi stage valving - precise control.
- Superior rod finish - increased seal durability.
- Multi lip seal - state of the art durability.
- Three year / 60,000km warranty.

GT-GAS	TYPICAL PART No. SERIES
SEALED STRUT	35-xxxx, E4xxx, E7xxx
SHOCK ABSORBER	15-xxxx, E1xxx, E5xxx, E2xxx
CARTRIDGE	25-xxxx, E3xxxx

GT SPORT

Designed with control and quality in mind, GT Sport achieves the desirable look of a lowered vehicle profile while providing optimum performance and control.

FEATURES

- Sports performance tuned.
- Incorporates proven Monroe Reflex™ Technology.
- Increased compression travel.
- Superior damping control with minimal suspension hardness
- Specially designed compression bumper rubbers.
- Exclusive twin disc design.
- Nitrogen gas pressurised.
- Inter-reliant strut and spring combination for maximum performance
- Dramatically reduces body roll and improved front to rear vehicle balance
- 3 year/60,000km warranty.
- Matched with lowered springs for maximum performance.

GT SPORT	TYPICAL PART No. SERIES
SEALED STRUT	35-xxxx
SHOCK ABSORBER	I5-xxxx, I6-xxxx

NOTE: E4036, E51003 and E5006 are not GT Sport.
There are no Exxxx GT Sport product.

MONRO-MATIC®

Monro-Matic Plus ride control products offer improved comfort and control for value priced vehicles and aged vehicles.

FEATURES

- Multi Lip Seals.
- Rod Guide Bearing.
- Hard Chromed Rod.
- Banded Piston.
- Cold Drawn Pressure Tube.
- High Strength Low Alloy Steel Strut Components.
- All Weather Fluid.
- 2 way valving.
- Multi Disc Valving For Durability.
- Three Valving Stages.
- Restores original ride comfort & handling.

MONROE ORIGINAL	TYPICAL PART No. SERIES
STRUT	80xxxxmm,
SHOCK ABSORBER	33xxxxmm

MONROE ORIGINAL

Designed to meet or exceed the motor vehicle manufacturer's specifications for original equipment.

FEATURES

- Teflon banded piston - low friction, long service life.
- High displacement, multi stage valving - precise control.
- Superior rod finish - increased seal durability.
- Multi lip seal.
- Two year/40,000km warranty.

MONROE ORIGINAL	TYPICAL PART No. SERIES
HYDRAULIC SEALED STRUT	11-xxx, R7xxx, R8xxx
HYDRAULIC SHOCK ABSORBER	R1xxx, R2xxx, R3xxx, R6xxx
HYDRAULIC CARTRIDGE	MR-xxx

WITH GAS TECHNOLOGY	TYPICAL PART No. SERIES
SEALED STRUT	34-xxxx, 16xxx, G16xxx, G7xxx, G8xxx, 71xxx, 81xxx
SHOCK ABSORBER	14-xxxx, 23xxx, 26xxx, 43xxx, G1xxx, G5xxx
CARTRIDGE	MG-xxx, 24-xxxx

GAS-MAGNUM TDT

Super duty gas charged shock absorbers. Engineered for 4x4 and light commercial vehicles for on and off-road use.

FEATURES

- Nitrogen gas charged.
- 1-3/8" (35mm) bore.
- Multi stage, high displacement valving.
- Superior chrome rod.
- Multi lip seal - state of the art durability.
- Three year/60,000km warranty.

GT-MAGNUM TDT	TYPICAL PART No. SERIES
SHOCK ABSORBER	16-xxxx
SPRING SEAT SHOCK ABSORBER	36-xxxx

GAS-MAGNUM

Super duty gas charged shock absorbers. Engineered for 4x4 and light commercial vehicles for on and off-road use.

FEATURES

- Nitrogen gas charged.
- Large bore.
- Multi stage, high displacement valving.
- Superior chrome rod.
- Multi lip seal - state of the art durability.
- Two year/40,000km warranty.

GAS-MAGNUM	TYPICAL PART No. SERIES
SHOCK ABSORBER	34xxx, Mxxxx, Dxxxx, L16xxxx

GAS RISER

A versatile gas pressurised heavy duty unit that enables ride height adjustment. Ideal for vehicles that operate under a variety of load and towing conditions.

FEATURES

- 150psi rating.
- Teflon banded piston.
- Gas pressurised.
- Multi lip seal.
- Two year/40,000km warranty.

GAS RISER	TYPICAL PART No. SERIES
SHOCK ABSORBER	MGR-xxx, LAxxx

MONROE COMMERCIAL

Commercial strength shock absorbers engineered for high kilometre long haul use with proven durability to withstand severe terrain operation.

FEATURES

- Magnum 60, 1- 3 /8" (35mm) bore.#
- Multi lip seals - state of the art durability.
- Heavy duty construction and valving.
- One year/150,000km warranty.

On most applications

MAGNUM COMMERCIAL	TYPICAL PART No. SERIES
SHOCK ABSORBER	6xxx, Vxxx

STEERING DAMPER

Absorbs steering shock and vibration caused by road irregularities - cracks, corrugations, holes, rocks and wheel tracks. Ideal for use on 4x4 and commercial vehicles.

FEATURES

- 50/50 damping control.
- Superior Nitro Carburized plated piston rod.
- Multi stage valving.
- Boot assembly sold separately.
- One year/20,000km warranty.

STEERING DAMPER	TYPICAL PART No. SERIES
DAMPER	SC--xxxx, R-3256

MAX-LIFT

Max-Lift is a sealed, gas filled pressure cylinder that exerts an outward force. This force acts like a spring to lift and hold open hatches, bonnets and boots. An exact replacement fit for most applications.

FEATURES

- Superior rod finish - increased seal durability.
- Teflon piston seal - superior sealing strength.
- High pressure gas filled - smooth action.
- One year warranty.

MAX-LIFT	TYPICAL PART No. SERIES
GAS SPRING	MLxxxx

STRUT MATE

Protection Kit

Too often a new strut or cartridge is fitted with the old original and damaged suspension travel limit bushing (compression bumper) and dust boot.

The Monroe Strut Mate kit includes a high quality, soft entry urethane compression bumper, a new dust boot, retaining strap and fitting instructions.

FEATURES

- Premium quality microcellular urethane bumper.

STRUT MATE	TYPICAL PART No. SERIES
	636xx PKxxx SMxxx

Mounting Kit

Designed by Monroe engineers to provide optimal fit and performance with Monroe Struts, strut mounts, or "bearing plates", are critical components of vehicle suspension systems.

Strut mounts have replaced upper ball joints in strut-equipped vehicles, and are the pivot point of your vehicle's suspension. This integral component, working together with the strut, helps isolate road vibrations and assists with smooth steering.

Strut-Mate Mounting Kits feature:

- OE-style bearings
- SAE-grade nuts and bolts
- Superior rubber-to-steel bonding
- Plated steel for longer wear
- Manufacturing to OE specifications

STRUT MATE	TYPICAL PART No. SERIES
	9019xx - 9079xx, MKxxx

MAGIC CAMBER

Magic Camber from Monroe is a simple solution to the problem of camber correction. It enables camber to be corrected on most vehicles fitted with strut type suspension.

Incorrect camber can increase tyre wear by a staggering 20-50% and have a serious effect on a car's performance and safety.

MAGIC CAMBER	TYPICAL PART No. SERIES
KIT	MCxxx

TOOLS

Branick Spring Compressor. Part no. 7600

The Branick 7600 delivers increased torque to handle your entire spring exchange requirements, including heavy duty, Ford F-150 or the Toyota RAV-4 without the need for additional adaptors.

And to make things easier, we've opened up the front for improved access. With the ability to deliver on long, short, narrow or angled struts, the Branick 7600 is the right tool for the job.

OPERATOR SAFETY FEATURES INCLUDE:

- Doesn't require adaptors
- Heavy duty Acme thread
- Versatile mounting options
- Multi-position hooks
- All steel construction

MONROE QUALITY AND DURABILITY MAKES MAX-LIFT™ THE ONLY CHOICE.

Monroe Max-Lift gas charged lift supports are now available as exact replacement fits for most vehicles sold in Australia since 1980.

Max-Lift is the market's premium replacement product. The highest quality, design and durability standards have been applied to their manufacture. And isn't that what your customers have a right to expect?

- 1 Plastic fittings for tubes and rod ends.
- 2 Electrical fittings for connecting hatchback accessories when necessary.
- 3 Pressure cylinder manufactured for maximum durability and corrosion resistance.
- 4 Gas chamber filled with high pressure, insert gas to provide lifting force and oil to control rate of lift.
- 5 Interior wall with polished surface for smooth action.
- 6 Piston assembly with electrical wiper when required; piston valving designed to eliminate clogging; and Teflon piston seal for superior sealing strength.
- 7 Limit groove assures precise free-length.
- 8 Seal assembly captive lubrication device when required; main seal; and durable plastic rod guide which reduces potential rod abrasion.
- 9 Rod coated in a salt nitride process for exceptional corrosion resistance and durability.

MAX-LIFT™ FITMENT GUIDE

Special Note

By reducing the measurement from Point A to Hinge Point E by 20mm, this will give you an extra 10° (degrees) lift.

Ball Stud 10 Pk Part No. MLSMP35I available.

FOR WHEN YOU NEED A LIFT

HATCH, BONNET, CANOPY & BOOT GAS STRUT SUPPORTS

Max-Lift is a sealed, gas filled pressure cylinder that exerts an outward force. This force acts like a spring to lift and hold open hatches, bonnets and boots.

Max-Lift is the market's premium replacement product. The highest quality, design and durability standards have been applied to their manufacture and are now available as exact replacement fits for most vehicles sold in Australia since 1980.

MONROE QUALITY AND DURABILITY MAKES MONROE MAX-LIFT™ THE ONLY CHOICE.

FEATURES

- Superior rod finish - increased seal durability.
- Teflon piston seal - superior sealing strength.
- High pressure gas filled - smooth action.
- One year warranty.

BENEFITS

- 1** Plastic fittings for tubes and rod ends.
- 2** Electrical fittings for connecting hatchback accessories when necessary.
- 3** Pressure cylinder manufactured for maximum durability and corrosion resistance.
- 4** Gas chamber filled with high pressure, insert gas to provide lifting force and oil to control rate of lift.
- 5** Interior wall with polished surface for smooth action.
- 6** Piston assembly with electrical wiper when required; piston valving designed to eliminate clogging; and Teflon piston seal for superior sealing strength.
- 7** Limit groove assures precise free-length.
- 8** Seal assembly captive lubrication device when required; main seal; and durable plastic rod guide which reduces potential rod abrasion.
- 9** Rod coated in a salt nitride process for exceptional corrosion resistance and durability.

IMPORTANT NOTES

When ordering a Gas Strut, please advise the following:

- Overall length from centre to centre (Extended)
- Pressure
- Type of end fittings
- Year, Make and Model of vehicle

HOW TO MEASURE A GAS STRUT

- Overall length is measured with strut fully extended and taken between the centre's of the fixing studs.
- Stroke is measured between top of strut barrel and end of shaft fitting.

COMMON SUSPENSION ISSUES RESOLVED BY MONROE

Issue: Are your customers experiencing pulling or binding in their steering with increased vibrations, rumbling, grinding or knocking noises?

Inspection: The three most common strut mounts are inner plate, centre sleeve and spacer bushings. If inspection reveals cracks or tears in the rubber bushing or the bearings are binding, the strut mount requires replacement.

Solution: When fitting new struts replace bump stops and strut mounts with a Monroe® Strut-Mate Kit and a Monroe® Strut-Mate Mounting Kit.

Polyurethane bump stops 'compress' when absorbing impact and absorb fluid and oils, which induces deterioration. Monroe® Strut-Mate kits include bump stop, dust boot and retaining strap.

Strut mounts are critical to a vehicle's suspension, prolonging the life of struts or shock absorbers. Monroe® Strut-Mate Mounting Kits isolate road vibrations and make steering smoother. Check bump stops and strut mounts at your customers' 20,000km safety check.

Check shocks at 20,000kms and change your worn shocks at 80,000kms.

BUILT TOUGH FOR ALL CONDITIONS.

Monroe's Gas Magnum TDT range for raised 4x4s has been engineered to work in conjunction with raised height springs, designed to sustain knocks, while producing maximum damping response in all weather conditions and minimal fading in harsh conditions.

FEATURES

- Australian made for Australian conditions.
- Exclusive Twin Disc Technology (TDT) has been combined with Monroe's legendary durability to keep you safe and comfortable on virtually any type of surface.
- Engineered to take the knocks and produce maximum damping response under all four wheel drive applications, with minimal fading in harsh conditions.
- Monroe's Gas- Magnum TDT smooths out the constant acceleration and braking and eliminates the sway associated with a high centre of gravity while providing fast response when needed.
- Three year, 60,000 km, warranty.

BENEFITS

- 1** Twin Disc Technology (TDT) delivers sure-footed control on all road conditions, providing enhanced stability and safety.
- 2** Large 35mm bore, double welded mountings, dust shielded and hard chrome plated piston rod all provide for increased strength and durability.
- 3** Nitrogen pressurised against cavitation and aeration.
- 4** Patented design uses Teflon to reduce friction, heat and wear.
- 5** Durable twin-tube construction.

FITTING KITS AND REPLACEMENT PARTS

PART No.	DESCRIPTION	CONTENTS
AK18	Installation Kit	Qty. - 1 (complete)
AK-216	Bracket	Qty.- 2 Brake Hose Bracket - fitting kit.
AK-28	Mounting Kit	Mounting bolt x 1, Camber bolt x 1, Nuts x 2, Mounting plate x 1
AK-58	Mounting Kit	Qty - 2 x Mounting bolts
AK-70	Mounting Kit	Qty.-1 Mounting bolt. Qty. -1 Sleeve & bush assy.
AKP-003	Spacer Kit	Qty. - 2 Valiant - Spacers and mounting nuts
AKP-005	Heat/stone shield	Qty. - 2 (Shields & hose clamps)
AKP-006	Air Line	Qty. - 1 (5.1 metres nylon line)
AKP-008	O-Rings	Qty. - 20 (per pack)
AKP-024	Tee-Valve	Qty. - 1 (Tee-valve assy, o-rings, caps, washer, nut)
AKP-025	Nuts-Air Line	Qty. - 10 (per pack)
AKP-027	Installation Kit	Qty. - 1 (complete)
AKP-029	Spacer Kit	Qty. - 2 flat spacers (Mazda & Ford commercial)
AKP-031	Reducer Bushes	Qty. - 2 Air line reducer bushes.
MLSMP-351	Maxlift stud pack	Qty - 10 Ball studs 10mm.
SMP-002	Mounting components	Qty. - 2 Mounting bushes.
SMP-022	Mounting components	Qty. - 2 Mounting bushes.
SMP-025	Mounting components	Qty. - 2 Mounting bushes.
SMP-052	Mounting components	Qty. - 2 Mounting bushes. Qty. - 2 Mounting plates. Qty. - 1 M10 X 1.25 Nyloc nut.
SMP-107	Mounting components	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Nyloc nut
SMP-188	Mounting components	Qty. - 1 Mounting bush.
SMP-262	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Hex nut 3/8 -24
SMP-312	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Nyloc nut
SMP-316	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Nyloc nut
SMP-318	Mounting components	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Nyloc nut
SMP-328	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 1 Metal washer. Qty. - 1 Nyloc nut
SMP-329	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 1 Metal retainer. Qty. - 1 Metal washer. Qty. - 1 Nyloc nut
SMP-333	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 3 Metal retainers. Qty. - 1 Nyloc nut
SMP-334	Mounting components	Qty. - 2 Mounting bushes. Qty. - 1 Metal retainer. Qty. - 1 Metal washer. Qty. - 1 Nyloc nut
SMP-343	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 4 Metal washer. Qty. - 1 Nyloc nut 1/2 x 24
SMP-344	Mounting components.	Qty. - 2 x Metal spacers.
SMP-345	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Locknut M12 x 1.25
SMP-352	Mounting components	Qty. -1 Locknut M16 x 1.5. Qty. -2 GMH nuts. Qty. -2 GMH Set screws.
SMP-353	Mounting components	Qty. - 2 M10 X 1.25 Nyloc Nuts
SMP-355	Bearing assembly	Qty. - 1 Bearing. Qty. - 1 seal. Qty. - 2 Dust cover. Qty. - 1 Clip. Qty. - 2 Screw. Qty. - 1 Grease kit.
SMP-377	Mounting components.	Qty. - 2 Metal retainers.
SMP-382	Mounting components	Qty. - 2 Mounting bushes. Qty. - 3 Metal retainers. Qty. - 1 Nyloc nut
SMP-383	Mounting components	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Nyloc nut
SMP-384	Mounting components	Qty. - 2 Mounting bushes. Qty. - 1 Metal retainer.
SMP-387	Mounting components	Qty. - 2 Metal washers.
SMP-388	Mounting components.	Qty. - 1 Metal washers.
SMP-404	Mounting components	Qty. - 2 Mounting bushes. Qty. - 4 Metal retainers. Qty. - 1 Nyloc nut
SMP-405	Mounting components	Qty. - 2 Mounting bushes. Qty. - 2 Metal retainers. Qty. - 1 Nyloc nut.
SMP-416	Bracketry components	Qty. - 2 A.L.B. Brackets. Qty. - 2 Metal washers M8. Qty. -2 Nyloc nut M8 x 1.25.
SMP-421	Mounting components	Qty. - 1 Spacer
SMP-442	Fitment components	Qty - 1 Metal spacer for cartridge location.
SMP-456	Mounting components.	Qty. - 1 Mounting bush. Qty. -1 Mounting sleeve.
SMP-467	Mounting components.	Qty. - 2 Mounting bushes. Qty. - 1 Metal washer. Qty. -2 Nyloc nut M10 x 1.25.
SMP-485	Mounting components	Qty. - 6 Mounting bushes. Qty. - 2 Metal retainer. Qty. - 2 Metal washer. Qty. - 3 Nyloc nut
SMP-491	Mounting components	Qty. - 2 Metal retainers.
SMP-507	Mounting components	Qty - 1 Rubber cushion. Qty - 2 Metal retainers - 1 x M10 Nyloc nut.
SMP-528	Rod adaptor kit	Qty - 2 x rod adaptor sleeves
SMP-643	Shock mounting pack including dust boots	Qty - 4 Retaining washers, Qty 2 Locating washers, Qty - 2 Nyloc nuts, Qty - 4 Mounting bushes, Qty - 2 Cable ties, Qty - 2 Dust Boots
SMP-644	Shock mounting pack including dust boots	Qty - 4 Retaining washers, Qty - 2 Nyloc nuts, Qty - 4 Mounting bushes, Qty - 2 Cable ties, Qty - 2 Dust Boots
SMP-645	Shock mounting pack including dust boots	Qty - 4 Retaining washers, Qty - 2 Locating washers, Qty - 2 Nyloc nuts, Qty - 4 Mounting bushes, Qty - 2 Cable ties, Qty - 2 Dust Boots
SMP-646	Shock mounting pack including dust boots	Qty - 4 Large, 4 Small retaining washers, Qty - 2 Large, 4 Small nyloc nuts, Qty - 4 Large, 8 Small mounting bushes, Qty - 2 Cable ties, Qty - 2 Dust Boots
SMP-648	Rod adaptor kit	Qty - 2 x rod adaptor sleeves
SMP-651	Rod adaptor kit	Qty - 2 x rod adaptor sleeves
SMP-744	Mounting components	Qty - 2 Mounting bush, Qty - 2 Metal spacer, Qty - 2 Metal spacer washer

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES																												
2	Use *3004 in struts having 45mm outside diameter and *3411 in struts having 51mm outside diameter																												
3	Excluding vehicles with self levelling suspension																												
4	Valiant models RV1, SV1, AP5, AP6, VC, VE, VF & VG must use spacer kit AKP-003, on top mounting when fitting MGR-511.																												
5	Strut 11014 replaces original equipment struts 4412990, 4412991, 4418701, 4424781, 4431262, 4434259, 4434934.																												
6	Excluding sealed struts																												
7	Cartridges suit original equipment struts having dimension from spring seat weld to bottom of strut outer tube of 267mm (10.5"). If this dimension is 273mm (10.75") the spacer washer supplied with the cartridge must be positioned between the base of the cartridge and the strut housing.																												
9	Re-use original top mounting components																												
10	Excluding coupe																												
11	Optional GAS MAGNUM - recommended for extreme use.																												
12	GAS-RISER shock absorbers cannot be fitted to any Ford vehicles having rear disc brakes if manufactured before July 1976																												
13	Suits vehicles with ABS and without ABS																												
14	When fitting long travel shock absorbers to a vehicle with coil springs, ensure that spring retention is maintained.																												
15	The lower cross pin of this shock absorber may need to be slightly filed (round file) to suit the lower mounting bolts. It may also be necessary to slightly enlarge part of the hole in the lower suspension member to allow the shock absorber to pass through. DO NOT FILE OR MODIFY THE SHOCK ABSORBER																												
16	Spacer Kit AKP-029 may be required on top mounting to ensure sufficient clearance between shock absorber and chassis rail.																												
17	It may be necessary to slightly enlarge the hole in the lower suspension member to allow the shock absorber to pass through - DO NOT modify or file the shock absorber.																												
18	Two shock absorbers are required for each side.																												
19	Re-use original lower mounting tube (sleeve). Remove tube from original lower shock absorber mounting rubber and position in lower mounting of shock absorber 15-1590																												
20	MG-947 for use in Struts 82301005, 82346277, 82341690																												
21	MR-833 for use in Struts 82327791, 82315777, 82346272, 82341684																												
22	MR-946 for use in Struts 82287222, 82346273, 82315779, 82341685																												
23	MR-967 for use in Struts 82326804, 82318517, 82341688, 82386804, 82346274																												
24	The lower cross pin of this shock absorber may need to be slightly filed (round file) to suit the lower mounting bolts.																												
25	When fitting *4268, 11072 to these vehicles, AK-216 bracket kit must be used.																												
26	Suits XD model only																												
27	When fitting 27-3937A1 and 25-3937 to Scorpion struts, Locking ring 137-A61-007 (available separately) must be used.																												
28	Excluding EXA																												
29	GE Sigma has three front strut types - select the correct cartridge from the following chart																												
<table><tr><th rowspan="2">MONROE CARTRIDGE</th><th rowspan="2">ORIGINAL STRUT COLOUR</th><th colspan="4">GENUINE PART NUMBERS</th></tr><tr><th colspan="2">Strut</th><th colspan="2">Cartridge</th></tr><tr><td>27-3937+A1 25-3937+</td><td>Black</td><td>MB001670 MB002020</td><td>MB001671 MB002097</td><td>MB109809 4152554</td><td>4067444 4157000</td></tr><tr><td>25-0625+A1 24-0625+</td><td>Blue or Brown</td><td>4162040 4155917</td><td>4155090 4158144</td><td>4152429 4157772</td><td>4155442 4158612</td></tr><tr><td>27-3646+A1 25-3646+</td><td>Green</td><td colspan="2">4155412</td><td colspan="2">4155444</td></tr></table>		MONROE CARTRIDGE	ORIGINAL STRUT COLOUR	GENUINE PART NUMBERS				Strut		Cartridge		27-3937+A1 25-3937+	Black	MB001670 MB002020	MB001671 MB002097	MB109809 4152554	4067444 4157000	25-0625+A1 24-0625+	Blue or Brown	4162040 4155917	4155090 4158144	4152429 4157772	4155442 4158612	27-3646+A1 25-3646+	Green	4155412		4155444

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES														
30	Measure outside diameter of O.E. shock absorber lower loop, (or diameter of lower shock absorber mounting bolt on vehicle) - if 37mm use 17-0405, 15-0405 (16mm diameter mounting bolt) - if 44mm use 15-3098, 110-1372, 14-1372 (18mm diameter mounting bolt).														
31	For use on vehicles having a 44mm outside diameter rear lower shock absorber mounting loop, (or 18mm diameter lower vehicle mounting bolt).														
32	Nissan 1600 has three front strut lengths - select the correct cartridge from the following chart.														
	<table><tr><td></td><td><table><tr><th>Part No.</th><th>Dim (A)</th><th>Genuine Strut Part Number Assembly</th></tr><tr><td>25-3938+</td><td>267mm (10.5")</td><td>54302(3) -21025(6) -21027(8) -22025(6) -22027(8) -A0825(6) -A8625(6) -A1125(6) -A1127(8) -E7626</td></tr><tr><td>25-3939+A1 24-3939+</td><td>279mm (11.0")</td><td>54302(3) -N0825(6) -N0828 -N2125(6) -N1325(6) -N1327(8) -N2128 -U0128 -U0528</td></tr><tr><td>NO COVERAGE</td><td>292mm (11.5")</td><td>54302(3) -A3025(6) -A3725(6) -A3727(8) -A8825(6) -A8925(6) -A9425(6) -N0225(6) -22125(6) -22127(8) -22525(6) -22527(8)</td></tr></table></td></tr></table>		<table><tr><th>Part No.</th><th>Dim (A)</th><th>Genuine Strut Part Number Assembly</th></tr><tr><td>25-3938+</td><td>267mm (10.5")</td><td>54302(3) -21025(6) -21027(8) -22025(6) -22027(8) -A0825(6) -A8625(6) -A1125(6) -A1127(8) -E7626</td></tr><tr><td>25-3939+A1 24-3939+</td><td>279mm (11.0")</td><td>54302(3) -N0825(6) -N0828 -N2125(6) -N1325(6) -N1327(8) -N2128 -U0128 -U0528</td></tr><tr><td>NO COVERAGE</td><td>292mm (11.5")</td><td>54302(3) -A3025(6) -A3725(6) -A3727(8) -A8825(6) -A8925(6) -A9425(6) -N0225(6) -22125(6) -22127(8) -22525(6) -22527(8)</td></tr></table>	Part No.	Dim (A)	Genuine Strut Part Number Assembly	25-3938+	267mm (10.5")	54302(3) -21025(6) -21027(8) -22025(6) -22027(8) -A0825(6) -A8625(6) -A1125(6) -A1127(8) -E7626	25-3939+A1 24-3939+	279mm (11.0")	54302(3) -N0825(6) -N0828 -N2125(6) -N1325(6) -N1327(8) -N2128 -U0128 -U0528	NO COVERAGE	292mm (11.5")	54302(3) -A3025(6) -A3725(6) -A3727(8) -A8825(6) -A8925(6) -A9425(6) -N0225(6) -22125(6) -22127(8) -22525(6) -22527(8)

36	It may be necessary to slightly file/grind the compression bumper support plate when fitting the large diameter Gas-Magnum shock absorbers.														
37	Optional GAS-Riser for front application.														
38	Use with original equipment rod-nut, (self locking Tee-nut).														
39	Not recommended for vehicles fitted with automatic leveling units unless suspension spring is replaced with O.E standard spring.														
40	Excluding Seca														
41	81783,71783 replaces O.E. Struts no's 721032080, 721032081, 721032130, 721032131.														
42	81784 replaces O.E. Struts no's. 721032063,064.														
43	Suits vehicles 04/1993 -1994 only														
44	16157 replaces O.E. Strut no's. 21009GA241, 21009GA261, 21009GA281, 21009GA301 & 21520GA020, 21520GA040.														
45	16158 replaces O.E. Strut no's. 21009GA251, 21009GA271, 21009GA291, 21009GA311 & 21520GA030, 21520GA050.														
46	Check strut outer housing part number. - MR-935 for use in struts 48510-14010, 48510-14080 - 25-3648 for use in all remaining struts.														

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES
47	It may be necessary to slightly enlarge the hole in the lower suspension member to allow the shock absorber to pass through - DO NOT MODIFY OR FILE THE SHOCK ABSORBER. Measure between centers of lower mounting studs - If 58mm use 15-3146 - If 64mm use 15-0176.
48	Excluding 1980 on Turbo vehicles.
49	Excluding High Deck vehicles.
50	When fitting 37-0291 and 35-0291 to V6 Magna and Verada, Strut-Mate part number 63619 must be used. DO NOT re-use original compression bumper.
51	Not recommended for vehicles with locating cups welded to lower shock absorber mounting point.
52	Not recommended for VN, VP models.
53	When fitting 17-2034 or 15-3034 to this vehicle, kit SMP-491 must be used.
54	Vehicles with independent rear suspension must use retaining washer kit SMP-377 (available separately) on lower mounting
55	Some vehicles use 2 shock absorbers per axle, others use 4 shock absorbers per axle - check vehicle configuration for correct usage.
56	One PK018 boot kit is required to fit 2 x R-3727 when fitting to Jan 85 Mazda 929, chassis number HB540450 on. We recommend fitting PK 018 to the earlier Model 10/81 -12/84 Mazda 929 if the original dust shields are damaged.
57	11089 replaces O.E. Struts no's. 21032GA101, 21032GA431, 21032GA451, 21032GA761, 21032GA781.
58	11090 replaces O.E. Struts no's. 21032GA111, 21032GA441, 21032GA461 , 21032GA771, 21032GA791.
59	23356 replaces O.E. S/abs. no's. 21007GA091, 21007GA092, 21007GA170, 21007GA391.
60	71268 replace O.E. S/abs. no's. 21007GA430, 21007GA431, 21007GA880 & 21106GA280.
61	Canopy applications are indicative only. Check specifications against existing springs before replacing.
62	When fitting to Apollo, Avalon, Camry, (incl. Vienta), Lexus, Strut-Mate part number 63619 must be used. DO NOT re-use original compression bumper.
63	Packed & sold as handed pairs. Order this part number to receive both left & right hand units.
64	This product has been designed to replace adjustable suspension unit with non-adjustable unit using the existing springs, provided the springs are in good condition.
65	Not suited for the replacement of the Hi-Riser in vehicles with Leveling Suspension.
66	For G200 vehicles with A.B.S. use kit SMP-416 - purchase as a separate item.
67	Ensure that the lower mounting bolt is tightened to O.E. specifications (88N-m)
68	When fitting 25-0333, Kit number SMP-442 may be required to compensate for over length Strut leg.
69	Raising the ride height may cause damage to the universal joint joining the differential to the tailshaft.
70	Replacing original p/no. 14QK-2107-P1
71	Replacing original p/no. 14QK-2113-P6
72	Replacing original p/no. 14QK-366-P1
73	Replacing original p/no. 14QK-2115
74	Replacing original p/no. 14QK-2100-P1
75	Without rear wiper.
76	With rear wiper.
77	Without rear spoiler.
78	With rear spoiler.
79	Long wheel base only.

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES														
80	Will suit GL, Ti OE 90452J9000 (excluding Q, SSS, CX & imported.)														
81	This product is been designed to replace self leveling suspension unit with non self leveling suspension unit using the existing springs, provided the springs are in good condition.														
82	For high roof vehicles.														
83	Excluding step roof.														
84	For mid roof vehicles.														
85	For low roof vehicles.														
86	For low and mid roof vehicles.														
87	Excluding SX, GSC & Coupe.														
88	Suits VB, VC, VH only.														
89	Suits VK, VL only.														
90	Suits VN, VP only.														
91	81223,71223 have non adjustable spring seat and is preset at maximum ride height to suit O.E. S/abs. no's 21007GA470,471.														
92	Excluding O.E part numbers B15662620AA, 333972280N, B0939C10 & B1285128.														
93	Suits vehicles 6/86-9/89 only														
94	Suits vehicles 9/89-10/90 only														
95	When fitting these struts, SMP-355 may be required if the bearing needs to be replaced.														
96	Suits ST162 only.														
97	When fitting Max-lift to Magna & Verada, the supplied ball studs must be used.														
99	Re-use original top mounting components.														
101	Forward of front axle														
102	Rear of front axle														
103	Suits vehicles 87-90 only.														
104	Suits vehicles 90-93 only.														
105	When replacing struts, or fitting Magic Camber, it is recommended that the clevis bolts are replaced using kit SMP-352														
106	If the lower mounting bolt & bushing require replacement, purchase kit AK-70.														
107	When fitting to EA,NA,DA (88-91) use supplied fitting kit SMP-338														
108	Upper mounting kit SMP-507, supplied with part number 35-0540, is for use only with Ford models EB,ED,NC,DC (92-94). Use strut part number 35-0191 for models EA,NA,DA (88-91).														
109	When fitting to EF,EH,EL,NF,NL,DF use supplied fitting kit SMP-534														
110	Excluding MX-6														
111	Nissan Pulsar N15 has two different front strut spring seat positions. Select the correct strut from the following chart.														
	<table><tr><td></td><td><table><tr><th>Part No.</th><th>Dim (A)</th><th>Datum point</th></tr><tr><td>E4360+</td><td>216 mm (8.5")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr><tr><td>G16255/G16256</td><td>216 mm (8.5")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr><tr><td>G16265/G16266</td><td>246 mm (9.7")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr></table></td></tr></table>		<table><tr><th>Part No.</th><th>Dim (A)</th><th>Datum point</th></tr><tr><td>E4360+</td><td>216 mm (8.5")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr><tr><td>G16255/G16256</td><td>216 mm (8.5")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr><tr><td>G16265/G16266</td><td>246 mm (9.7")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr></table>	Part No.	Dim (A)	Datum point	E4360+	216 mm (8.5")	Measure from bottom of spring to centre of lower clevis hole	G16255/G16256	216 mm (8.5")	Measure from bottom of spring to centre of lower clevis hole	G16265/G16266	246 mm (9.7")	Measure from bottom of spring to centre of lower clevis hole
	<table><tr><th>Part No.</th><th>Dim (A)</th><th>Datum point</th></tr><tr><td>E4360+</td><td>216 mm (8.5")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr><tr><td>G16255/G16256</td><td>216 mm (8.5")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr><tr><td>G16265/G16266</td><td>246 mm (9.7")</td><td>Measure from bottom of spring to centre of lower clevis hole</td></tr></table>	Part No.	Dim (A)	Datum point	E4360+	216 mm (8.5")	Measure from bottom of spring to centre of lower clevis hole	G16255/G16256	216 mm (8.5")	Measure from bottom of spring to centre of lower clevis hole	G16265/G16266	246 mm (9.7")	Measure from bottom of spring to centre of lower clevis hole		
Part No.	Dim (A)	Datum point													
E4360+	216 mm (8.5")	Measure from bottom of spring to centre of lower clevis hole													
G16255/G16256	216 mm (8.5")	Measure from bottom of spring to centre of lower clevis hole													
G16265/G16266	246 mm (9.7")	Measure from bottom of spring to centre of lower clevis hole													
112	For vehicles with wheels up to 18". Not recommended for vehicles with 19" wheels.														
114	When converting from self leveling to standard suspension, the rear springs must be replaced with heavy duty standard springs. Serviceable compression bump stops must be fitted.														
115	If the O.E. camber adjustment screw is seized or rusted, remove the screw & fit MC114 Magic Camber bolt														
116	Suits vehicles to 02/1995 only.														
117	Prior to removing the worn shock absorbers from the vehicle, it is important to read & comply with, the enclosed Safety Bulletin #600-027-144														

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES										
118	Mazda 626 GE & Ford Telstar AX,AY have two different rear strut spring seat positions. Select the correct strut from the chart. <table><tr><td rowspan="3"></td><th>Part No.</th><th>Dim (A)</th><th>Datum point</th></tr><tr><td>E4867</td><td>160 mm</td><td>Measure from the top of the mounting bracket to the bottom of the spring seat</td></tr><tr><td>E4975</td><td>138mm</td><td>Measure from the top of the mounting bracket to the bottom of the spring seat</td></tr></table>		Part No.	Dim (A)	Datum point	E4867	160 mm	Measure from the top of the mounting bracket to the bottom of the spring seat	E4975	138mm	Measure from the top of the mounting bracket to the bottom of the spring seat
	Part No.		Dim (A)	Datum point							
	E4867		160 mm	Measure from the top of the mounting bracket to the bottom of the spring seat							
	E4975	138mm	Measure from the top of the mounting bracket to the bottom of the spring seat								
119	When fitting, ensure that the bulge at the base of the steering damper is facing towards the ground.										
120	When fitting this unit to vehicles with worn or damaged lower mounting bolts, or vehicles that do not have lower camber adjustment capability, use kit AK-58 - purchase as a separate item.										
121	If play is detected between the upper mounting stud and the top spring plate assembly, fit Kit PK010+										
122	Part number MGR-161 is designed to have compatibility with the original equipment Ford self-leveling suspension airline fittings.										
123	When replacing struts that have no "step down" or reduced diameter on the piston rod (e.g. O.E. #MDX1C34900B) purchase and fit adaptor kit number SMP-648.										
124	Where design and fitment integrity allows, lengths have been extended to accommodate increased height										
125	Excluding ABS Brakes										
126	Including ABS Brakes										
127	When replacing struts that have no keyway on the piston rod (e.g. O.E. #MR223173, MR223174) purchase and fit adaptor kit number SMP-651										
128	When replacing struts that have no keyway on the piston rod (e.g. O.E. #MR297995, MR297996) purchase and fit adaptor kit number SMP-528										
129	When fitting to Tarago, ensure that serviceable compression bumpers are installed. It is recommended to fit part number 63619										
130	Note Before fitting BHB clip; ensure brake hose locating grommet is contained in the BHB. Inspect for any brake hose damage. To fit, place one edge over BHB as shown at (1), so that the slot in the clip slides through the BHB. Rotate clip toward bracket until other slot locates and bracket clips into place at (2). Press firmly across clip (3) ensuring clip is locked in place.										
131	Mazda2 and Fiesta vehicles have two different front strut designs. Select the correct strut from the chart. <table><tr><td></td><td></td></tr></table>										
											
133	AK28 Kit may be required to replace the original lower mounting bolts and nuts if damaged or unable to be re-used.										
134	This product is suitable for super low vehicle ride height and is strongly recommended for use in conjunction with compatible King Springs.										
135	Suits EB, ED Falcon only										
136	Suits EF, EL Falcon										

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES																														
137	These vehicles have two different front strut lengths. Choose the correct part from the following original equipment part numbers. 138	Suits the following OE part numbers:- Manual -51605-SAA-E02 R/H and 51606-SAA-E02 L/H CVT Auto -50601-SAA-E130 R/H and 50602-SAA-E130 L/H																														
139	Suits the following OE part numbers:- Manual -51605-SAA-004 R/H and 51606-SAA-004 L/H CVT Auto -50601-SAA-E720 R/H and 50602-SAA-E720 L/H																														
140	Suits 1994 to 1995 model																														
141	Suits 1996 to 8/1997 model																														
142	Suits 2000 to 1/2001 model																														
143	Suits 2000 to 2004 model																														
144	Suits 2004 to 6/2005 model																														
145	Suits 1998 to 2001 model																														
146	Suits 2002 model																														
147	Suits 2000 to 2002 model																														
148	Suits 2001 model																														
149	Suits 1997 to 2001 model																														
150	Suits 2001 onwards model																														
151	MGR-165 suits the original equipment air line and connection system, to replace OE units 92112618, 92209663 and 04E032709. MGR-165 is not supplied with an air line kit - the original equipment air line system must be used. To avoid shock absorber air sleeve damage, do not drive the vehicle unless the MGR-165 units are inflated. Follow the vehicle manufacturer's fitting instructions.																														
152	Volkswagen Caddy has two different front strut designs differentiated by the strut leg tube diameter. Select the correct strut from the chart. (A - G8005 or B - G8006)																														

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES
154	For some vehicles it may be necessary to cut/grind off the original equipment metal sleeve located on the upper mounting stud, in order to remove and re-use the original components.  Installation A. Use new enclosed part B. Original parts to be reused
155	Suits up to 09/2000 models
156	Suits vehicles without speakers in the rear door
157	Suits vehicles with speakers in the rear door
158	Suits 5 Door
159	Suits 3 Door
160	Suits up to OE part number 6A940841
161	Suits from OE part number 6A940842
162	Suits Dual Cab ute with Sports Bars
200	B1278 suits the following OE part numbers 81 43701 6672, 81 43701 6689, 81 43701 6706, 81 43701 6714, 81 43701 6715
201	Suits Air Suspension
202	Suits Heavy Duty Suspension
203	Suits steel leaf and parabolic springs
204	Requires 4 Shock Absorbers
205	Driving Axle, requires 4 shock absorbers
206	Trailing Axle, requires 4 shock absorbers
207	Suits original equipment standard height and original equipment raised height
208	B5259 suits original equipment part numbers 1004876, 81 43701 6266, 81 43701 6318, 81 43701 6324, 81 43701 6325, 81 43701 6326, 81 43701 6343, 81 43701 6386, 81 43701 6538, 81 43701 6539, 81 43701 6542, 81 43701 6543, 81 43701 6572, 81 43701 6606, 81 43701 6607, 81 43701 6550
209	B5260 suits the following original equipment part numbers 81 43701 6450, 81 43701 6573, 81 43701 6578
210	B5291 suits original equipment part numbers 357 323 0300, 357 323 0400
211	B5291 suits original equipment part numbers 81 43701 6670, 81 43701 6688, 81 43701 6713, 81 43701 6729
212	F5002 suits original equipment part numbers 02 3702 1800, 02 3702 6700, 196116, 2 376 0019 00
213	These vehicles have front struts having different outside diameters. Use part number E7028, E7029, E7052 and E7056 where original equipment strut housing has an outside diameter of 50mm, OR, Use part number E7057, E7031 where original equipment strut housing has an outside diameter of 55mm.

NOTES REFERENCE INFORMATION

NOTE NO.	NOTES
219	Part number V-4505 suits the following OE part numbers, 7H0 413 031 D, 7H0 413 031 G, 7H0 413 031 H, 7H0 413 031 K, 7H0 413 031 L, 7H0 413 031 M, 7H0 413 031 N, 7H5 413 031 D, 7H5 413 031 G
220	Part number V-1169 suits the following original equipment part numbers 7H0 513 029 D, 7H5 513 029 C, 7H5 513 029 D, 7H5 513 029 E
221	Part number V-1170 suits the following original equipment part numbers 7H0 513 029 E
222	When fitting shock absorber, attention must be paid to correct orientation, refer to markings on shock absorber for direction
223	Suits Leaf Spring Suspension
224	When fitting part number 71417, Strut-Mate Protection Kit 63628 must be fitted.
225	When fitting part number 71417, Strut-Mate Protection Kit 63628 must be fitted.
R20	This product suits vehicles having a raised ride height of up to 20mm over standard original equipment ride height.
R30	This product suits vehicles having a raised ride height of up to 30mm over standard original equipment ride height.
R35	This product suits vehicles having a raised ride height of up to 35mm over standard original equipment ride height.
R40	This product suits vehicles having a raised ride height of up to 40mm over standard original equipment ride height.
R45	This product suits vehicles having a raised ride height of up to 45mm over standard original equipment ride height.
R50	This product suits vehicles having a raised ride height of up to 50mm over standard original equipment ride height.
A1	While Stocks Last
A2	Part In Process
LH	Left Hand Unit
RH	Right Hand Unit
S/S	Shock Absorber with Spring Seat

NOTES REFERENCE INFORMATION

MAGIC CAMBER DIMENSION CHART

Part Number	Diameter	Thread	Length	Shank Length	Clevis Width*
MC110	10 mm	M10 x 1.25	85 mm	54 mm	36.0 – 48.0 mm
MC112	12 mm	M12 X 1.5	85 mm	55.5 mm	40.0 – 49.5 mm
MC114	14 mm	M14 x 1.5	90 mm	54.5 mm	35.0 – 48.0 mm
MC115	15 mm	M14 x 1.5	80 mm	48.5 mm	35.0 – 43.0 mm
MC116	16 mm	M16 x 2.0	85 mm	54.5 mm	41.5 – 48.0 mm
MC117	17 mm	M16 x 2.0	93 mm	55.5 mm	35.0 – 49.0 mm
MC212	12 mm	M12 x 1.5	75 mm	46.5 mm	30.0 – 39.0 mm

* Measured at the top bolt hole from the outer flat to the outer flat.

Correct Positive Camber

Rotate Camber bolts to adjust

Correct Negative Camber

Always refer to the vehicle manufacture's camber settings, and torque settings

NOTES REFERENCE INFORMATION

Fitting insruction for Falcon Strut Mate Kit SM-001

To Strut with 12mm. diam. shaft

With strut vertical on a non slip surface, place compression bumper on shaft with plastics cup removed. See "A"

Pull compression bumper downwards sharply to snap over locating flange until located as "B".

Pulling down smoothly will only result in the shaft being pushed into the shock absorber.

A small amount of a silicon based lubricant applied to the inside of the compression bumper may make application easier.

With compression bumper correctly located as at "B" clip plastic cup in place as at "C"

To Strut with 18mm. diam. shaft

SHOCK ABSORBER AND CARTRIDGE MEASUREMENT CHART

SHOCK ABSORBER LENGTH DIMENSIONS

NOTE: Compressed and extended lengths listed in the numerical listing of this catalogue taken from the Ferrule centres and/or Stud shoulders.

CARTRIDGE LENGTH DIMENSIONS

MATERIAL SAFETY DATA SHEET

OIL

The oil used in Monroe Shock absorbers, Cartridges and Struts is classified as “non hazardous” by Worksafe Australia, and does not contain any products that are harmful to health, however, as with all chemicals, it is recommended that gloves and safety glasses be worn when handling the oil.

The fluid is a refined mineral oil, “not classified as hazardous”, reference Infosafe number CV7R4 that states: “Avoid contact with skin and eyes and avoid breathing vapours or mist. When exposure is likely, personal protective equipment in a combination appropriate to the degree and nature of exposure should be selected from the following:

-

(1) Eye protection

(2) PVC gloves

Where the concentration of vapour or mist is expected to approach the exposure limit, the following additional equipment is recommended:

(1) Short elevated exposures e.g. spillages -goggles and correct respiratory protection (e.g. paper mask) should be worn

In the event of eye contact with the oil, flood eyes with plenty of water for 20 minutes. If irritation occurs, seek medical advice.”

The volume present should present no environmental risk if disposed of in the correct manner.

GAS

The gas used in Monroe Shock absorbers, Cartridges and Struts is naturally occurring, odourless and non-toxic in the volume present and presents no environmental harm. If de-gassing, allow the released gas to disperse for a minute or so before breathing the atmosphere close to the depressurized unit.

In relation to the airfreight of Monroe gas pressurised shock absorbers, please refer to the information as follows :-

- Gas charged shock absorbers are classified as non-flammable and non-toxic for airfreight
- Classification: UN no. 3164 label class 2.2. Pressurised Hydraulic of steel shell construction
- Gas volume does not exceed 320cc. Gas pressure at 20 deg. does not exceed 7 bar in the fully closed position
- Burst pressure is not less than 5 times the charge pressure.
The shock absorber gas seal is fire degradable.
- Refer packing instruction 208 of the I.A.T.A. Dangerous Goods Regulations.

SAFETY BULLETIN : REMOVAL OF COIL OVER SHOCK ABSORBERS FROM VEHICLES

For your safety, always apply the following safe practices when removing coil over shocks from a vehicle.

1. Always compress and safely retain the coil spring prior to removing the shock and spring assembly from the vehicle ensuring that the spring is compressed so that no spring force is on the piston rod or the spring seat.
2. Additionally if the shock is being removed due to a knocking noise the product should be de-gassed for maximum safety as the shock may have been damaged at installation or by vehicle accident and could have a loose shock rod.

De-gassing method for Monroe Australia manufactured product.

The gas is contained in the upper half of the outer tube body. Drill a small hole (maximum 2.0mm diameter) through the outer tube body above the mid-length point.

Note:

- Ensure safety glasses are worn and take care to protect the braking system from oil spillage
- De-gassing by this method should only be undertaken on Monroe manufactured product. Advice should be sought direct from the manufacturer of any other brand.

NOTES

IT'S IN OUR NAME

Bringing Innovative Technology to the Aftermarket

Each new generation of OE suspension technology will eventually become an aftermarket service opportunity. When it does, Monroe® will be there to provide the world-class products and support you need. Because as a premier global OE manufacturer, we help establish a standard of ride and handling excellence at every stage of a vehicle's life.

Start stocking Monroe® shocks and struts today.
Contact your representative for details.

COMMON CAUSES OF RETURN

OIL LEAKAGE

Cause: Chrome peeled off/leakage.

- ? Worn out bumper + dust shield.
- ! Check and replace with new bumper and dust shield.

DAMAGE

Cause: Abnormal damage or rust of the cartridge tube (accident damage, product abused or the presence of water inside strut housing).

- ? No oil put in the strut housing during assembly of the strut cartridge.
- ! Handle product with care prior to fitment, always put 50cc oil in strut for correct heat conduction.

OIL LEAKAGE

Cause: Piston rod chrome surface damaged (by vice grips or pliers).

- ? Piston rod and oil seal damaged after using pliers or grips during installation.
- ! Use the correct mounting tool to avoid the piston rod turning during the tightening of the central top nut.

DAMAGE

Cause: Stem end broken off.

- ? Tightened with power tool. Top bearing blocked (if present).
- ! Apply correct tightening torques (refer to vehicle manufacturer's specifications). Use correct tool. Check and replace upper bearing if necessary.

Cause: Chrome surface worn off at one side. Oil leakage.

- ? Cause:** Piston rod submitted to strong side-load, due to the tightening of the mountings with wheels hanging, suspension components bent, or incorrectly adjusted wheel alignment.
- ! How to avoid:** Only fully tighten shock absorber mountings with the wheels on the ground (shock absorber in working position). Inspect suspension components for signs of wear or impact damage.

Cause: Knocking noise. Paint worn off at bottom and on top of cartridge housing. Broken sealing (see right picture)

- ? Cause:** Cartridge not tightened correctly. Old locking ring reused. Not all provided parts used if needed (new locking ring/spacer/centering cap).
- ! How to avoid:** Apply correct tightening torques (refer to vehicle manufacturer's specifications). Use all provided parts according to the mounting instructions. Use correctly. Always check for movement of the cartridge once locking ring is tightened to specifications.

Cause: Knocking noise. Piston rod circlip damaged/out of groove.

- ? Cause:** Piston rod nut over-tightened forcing circlip from groove, or insufficiently tightened allowing movement of the mounting components causing circlip to be pushed out of groove.
- ! How to avoid:** Apply correct tightening torques (refer to vehicle manufacturer's specifications)..

Cause: Knocking noise. Irregular damage of the piston rod stem thread.

- ? Cause:** Mounting parts mounted incompletely or not put in the correct order. Mounting parts too tight or too loose after mounting.
- ! How to avoid:** Ensure all mounting parts assembled in the correct order and tightened to the correct specification (refer to vehicle manufacturer's specifications).

A GUARANTEE FOR YOU AND YOUR CUSTOMER

Warranty Statement

Monroe Australia warrants all Ride Control Products marketed under the Monroe brand name to the original retail purchaser against defects and premature loss of damping force for the periods stated below:

3 year/60,000 kilometres from date of retail sale or date of fitment, whichever occurs first.

- (a) GT GAS with Reflex™ Technology Products.
- (b) Gas-Magnum TDT products
- (c) GT Sport
- (d) OE Spectrum

2 Year/Unlimited kilometres from date of retail sale or date of fitment, whichever occurs first.

- (a) Magic Camber products
- (b) Van Magnum products

*excluding commercial use vehicles

2 Year/40,000 kilometres from date of retail sale or date of fitment, whichever occurs first.

- (a) Gas Riser products
- (b) Monroe Original products
- (c) Gas-Magnum products
- (d) Monro-Matic products

12 Months/Unlimited kilometres from date of retail sale or date of fitment, whichever occurs first.

- (a) Max-Lift products

12 Months/20,000 kilometres from date of retail sale or date of fitment, whichever occurs first.

- (a) Steering dampers

12 Months/150,000 kilometres from date of retail sale or date of fitment, whichever occurs first.

- (a) Magnum 70, 60, Fxxx, Bxxx, Txxx Series

Warranty Claims

1. Monroe Australia is dedicated to the pursuit of product excellence and the achievement of maximum consumer loyalty.

2. Monroe Distributors are qualified to validate all Warranty Claims, but Monroe Australia reserves the right to inspect all units claimed as defective.

3. Subject to the terms of this Warranty and subject to the exclusions from Warranty set out in the next section below (Exclusions), Monroe Australia will replace a defective unit provided:

a. A fully completed Monroe Australia Warranty Claim Form is presented with each defective unit to the Monroe Distributor from whom the defective unit was purchased or to Monroe Australia at the address below. (One claim form can be used for up to two defective units. Please nominate the number of units being claimed).

b. Information on the Warranty Claim Form includes all vehicle identification data, part number, fitting or sale dates and a description of the defect.

c. Both the customer's and reseller/installer's names, addresses and telephone numbers are provided to allow Monroe Australia representatives to contact claimants.

d. Copies of proof of purchase documents are attached to the warranty Claim Form which must be signed by the Monroe Distributor's claim officer.

4. This warranty is given by Monroe Australia Pty Ltd.
Business address:
1326 South Road, Clovelly Park SA 5042

Telephone No:
(08) 8374 5222 or 1800 088 205
Email Address:
customerservice@tenneco.com.au

5. The warranty periods for the various ride performance products are as set out in the Warranty Statement above.

6. The benefit of this Warranty is in addition to other rights and remedies the customer may have under a law in relation to the goods to which the Warranty relates.

7. The customer will bear the cost of claiming. The costs of removal of the defective unit and the replacement and refitting of the replacement unit are the responsibility of the customer.

Exclusions

Excluded from Monroe Warranty are

1. Units which have been modified or improperly installed as well as units fitted to vehicles contrary to application information contained in the Monroe Product Catalogue from time to time.

2. Cartridges claimed for noise, which have not been properly tightened down with the locking ring.

3. Severe interference between unit and other suspension components, causing noise or failure of the shock absorber.

4. Units that were involved in an accident and show dents and nicks.

5. On air-adjustable units, air-sleeve damage such as burn holes and abrasion caused by another part of the vehicle is specifically excluded from Warranty.

6. Units showing evidence of improper tightening of the mounting bolts causing parts to wear or bend.

7. Lower mounting studs on Ford Falcon front shock absorber twisted off by over tightening.

8. Vice jaw or "multigrips" type wrench marks on polished section of piston rod, causing damage to oil seal and oil leakage.

9. Struts and cartridges that have not been fitted with serviceable bumpstops (where originally fitted).

The Australian Consumer Law Mandatory Text:

"Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure".

To the extent permitted by law, all other warranties, conditions, representations, assertions and statements are expressly excluded.

TIPS ON SELLING SHOCK ABSORBERS

Identification

1. Road test the vehicle (listen for knocking shocks).
2. Bounce test the vehicle (the car should stop after 1 to 1.5 bounces).
3. Check shocks for leaks.
4. Check the bump stops for evidence of bottoming out.
5. Check for irregular tyre wear cupping – a series of flat spots at regular intervals).

Selling

1. Always report the condition of the shock absorbers to all customers. This helps raise customer awareness and understanding.
2. Explain the role shock absorbers play in the performance of the vehicle, i.e. improved stability, braking, steering and cornering.
3. Use the "Product Sales Guide" and Monroe brochures as sales aids, as they provide great information for the customer to understand the importance of shock absorbers.
4. Explain to the customer the importance of the 'safety triangle' – where brakes, tyres and shocks are all equally vital for safe motoring.

5. Customers can sometimes be surprised by the cost of replacing all 4 shock absorbers and affordability may be a factor. To assist in spreading the cost to the customers you could suggest the front shocks be given priority and replaced first, due to the braking forces and load they are subjected to daily, and recommend replacing the rear shocks at their next service.

Some helpful facts

1. A car travelling at 50 km/h could take an extra 2 metres to stop if just one shock absorber is worn.
2. Worn shock absorbers can increase tyre wear by as much as 7% (test conducted between Monroe & Pirelli).
3. Worn shock absorbers mean your tyres grip less and make it harder to steer.

THE SIGNS OF WORN SHOCK ABSORBERS

Although the best way to test your shock absorbers is through a workshop and road test by a qualified technician, there are some very distinctive signs of excessive shock absorber wear and tear you can keep an eye out for.

TROUBLE STOPPING

Worn shock absorbers can add as much as 20% to your stopping distance. That's the sort of fault that can be fatal and requires immediate attention.

SHAKE, RATTLE & ROLL

Notice that your car 'rock and rolls' over bumps, railway tracks or uneven surfaces? Not hugging the bends? Time to get those shock absorbers checked then!

SIDE SLIDE

If your car veers in side winds, particularly when the wind isn't so strong, you could have shock absorber problems.

NOSE DIVING & SWERVING

If the bonnet of your car dips when you brake or slow.

UNEVEN TYRE WEAR

If your tyres are wearing unevenly, particularly if there are bald patches, odds are it's your shock absorbers.

BAD VIBES

Uncomfortable steering wheel vibration could be shock absorbers.

SHOCK ABSORBERS SHOULD BE INSPECTED AT EVERY VEHICLE SERVICE.

IT'S WHAT'S INSIDE THAT COUNTS

Monroe OESpectrum[®] shock absorbers are designed with the latest global OE valving technologies, specific for each application which helps to increase the amount of driver control. So in other words, no matter where in the world the car is from... we've got you covered. monroe.com.au
